## Key Features

- **10.0 megapixels** for stunning prints as large as 16 x 20 inches
- **4x wide-angle optical Zoom-NIKKOR glass lens** for incredibly sharp, clear images
- **Optical VR image stabilization**
- **ISO 3200 capability**
- **Huge, bright 3.0-inch high resolution, wide viewing angle TFT LCD monitor** with anti-reflection coating
- **World's fastest start-up time\***
- **Active Child Mode**
- **Smile Mode**
- **Scene Auto Selector**
- **Nikon In-Camera Innovations**
  - **In-Camera Red-Eye Fix™** automatically fixes most instances of red-eye in the camera. You may never see red-eye again
  - **Improved Face-Priority AF** Nikon's face-finding technology that automatically focuses on up to 12 faces faster than ever
  - **Face Zoom-in** zooms right in on the subject's face during playback for images shot with Face-priority AF
  - **D-Lighting** rescues dark or backlit images by improving brightness and detail where needed

## ISO 3200 capability

Light sensitivity range up to ISO 3200 creates new opportunities to take sharper, more natural looking photos in lower light conditions, or to capture fast-moving subjects with outstanding clarity.

Better pictures in lower light

## Fully automated shooting ease with advanced shooting modes

Active Child Mode enhances the carefree shooting experience by automatically following the movement of your subject to ensure clear focus. Nikon's new Scene Auto Selector Mode provides carefree shooting in a variety of scenes by recognizing the setting and automatically selecting the appropriate scene mode. Smile Mode helps to faithfully record precious smiles in the brief instants they appear. And Food Mode makes it easy to capture delectable close-ups at the dinner table.

## Unbeatable speed and knock-out good looks bring new style to your photography.

Featuring the world's fastest start-up time\* of a mere 0.7 seconds, the optimized performance of the COOLPIX S610 frees you to capture special moments as you experience them.

## New smile mode

The COOLPIX S610 Smile Mode will detect up to 3 faces, focus, then automatically releases the shutter when the subject smiles.

## Optical VR image stabilization

without vibration reduction

with vibration reduction

Nikon's optical VR image stabilization compensates for camera shake to produce clearer, sharper results in lower light or unsteady conditions. Active full time, VR's stabilizing effects also aid in smooth, easy framing and shooting.

VR image stabilization

## In-Camera Premium Features!

**Face-Priority AF**  
Automatically finds and focuses on up to 12 faces to ensure superb portraits with clear, crisp focus.

**In-Camera Red-Eye Fix™**  
This in-camera feature automatically fixes most typical occurrences of red-eye.

Simply better portraits

**D-Lighting**  
Compensates for underexposed images or insufficient flash by automatically adding light and detail to selected shots where needed, without affecting properly exposed areas.
