

At the heart of the *image*™

AF-S DX Micro-NIKKOR 40mm f/2.8G

This standard DX-format close-up lens captures stunning details at any distance, including details practically impossible to detect with the human eye at 1X magnification.

Autofocus to 6.4 inches

Continuous autofocus from infinity to 6.4 inches (life-size /1X).

Nikon Super Integrated Coating (SIC)

Enhances light transmission and offers superior color consistency and reduced flare.

Close-Range Correction System (CRC)

Using Nikon's innovative floating element design, each lens group moves independently to achieve focus – providing high performance at both near and far distances.

M/A (Manual/Auto) focus mode switch

When fine manual focusing is needed, simply rotate the lens focus ring — M/A mode allows you to seamlessly override the AF system with virtually no time lag.

Sharp images from infinity to life-size (1X)

This standard close-up lens captures the finest details at any distance, including details practically impossible to detect with the human eye (at 1X magnification).

Compact and lightweight DX-format close-up lens

Compact size makes the AF-S Micro-NIKKOR 40mm f/2.8G mobile enough to carry everywhere. This high performance lens excels for both high quality stills and cinematic HD D-Movies.

Silent Wave Motor (SWM)

A significant innovation in AF lens technology, Nikon's Silent Wave Motor uses ultrasonic (inaudible) vibrations – rather than a gear system – to focus the lens, providing incredibly smooth, silent and precise autofocus operation whether shooting high quality stills or cinematic HD D-Movies.

Rounded 7-blade diaphragm

Renders a beautiful, natural background blur (Bokeh) at its wider aperture settings.

SPECIFICATIONS

Mount Type: Nikon F-Bayonet
Angle of view (DX-format): 38°50'
Diaphragm Blades: 7
Minimum Aperture: f/22
Maximum Aperture: f/2.8
Minimum Focus Distance: 0.163m / 6.4 inches
Maximum Reproduction Ratio: 1X
Weight: 280 g/9.9 oz.
Dimensions: 68.5 x 64.5 mm/2.7 x 2.5in
Focal Length: 40mm
Format: DX
Focus Mode: Auto, Manual, M/A
Lens Elements: 9
Lens Groups: 7
