The **COOLPIX S620** combines beauty and brains. It features the world's fastest start up in just **0.7 seconds**<sup>1</sup>. A superb 4x wide-angle zoom-NIKKOR lens is matched to a 12.2 megapixel image sensor for superb image quality. High performance features such as 4 way VR image stabilization, scene auto selector, subject tracking, smile mode with blink proof make taking beautiful pictures incredibly easy.

## EXPEED™

Nikon's smarter approach to digital imaging technology. From image capture to processing, Nikon's comprehensive EXPEED digital imaging concept encompasses the entire picture-taking operation. EXPEED is much more than a processing engine; it is a revolution in digital photography.

### 4 way VR Image Stabilization minimizes the effects of camera shake for sharper results

VR Image Stabilization

Motion Detection

High Sensitivity

- Nikon's **Optical VR image stabilization** compensates for the effects of camera shake by lens shift to reduce image blur.
- **Motion Detection** automatically detects a moving subject and adjusts shutter speed and the ISO setting to compensate for camera shake and subject movement.
- **High ISO 6400** capability helps give you sharper results when shooting in low light or capturing fast-moving subjects.
- Nikon's original **Best Shot Selector** automatically takes up to 10 shots while the shutter is pressed and saves the sharpest image.

### High-quality, ultra-compact design

The COOLPIX S620's stylish elegance combined with its ultra-compact design deliver swift response and advanced picture-taking functions. You'll also appreciate the quality optics of a precision 4x Zoom-NIKKOR lens with 28mm wide-angle cover and macro shooting ability as close as 0.8 inches. (2cm) from your subject.

### Nikon's Scene Auto Selector

Scene Auto Selector

Automatically recognizes the scene and selects from one of six scene modes for best results. The COOLPIX S620 will choose, Portrait, Night Portrait, Close-up (macro), Landscape, Night Landscape or Backlight mode.

### Subject Tracking

Subject Tracking

Subject Tracking will track a moving subject to ensure sharp focus. The camera will automatically track your subject – even if they, momentarily, move out of the frame.
