## Nikon COOLPIX S60

### Key Features

- **10.0 megapixels** for stunning prints as large as 16 x 20 inches
- **5x Optical Zoom-NIKKOR** glass lens for incredibly sharp, clear images
- **Optical VR image stabilization**
- **ISO 3200<sup>2</sup> capability**
- **New, amazing, bright 3.5-inch high-resolution TOUCH PANEL LCD**
- **Scene Auto Selector**
- **Smile Mode and Blink Warning**
- **Nikon In-Camera Innovations**
  - **In-Camera Red-Eye Fix™** automatically fixes most instances of red-eye in the camera. You may never see red-eye again
  - **Improved Face-Priority AF** Nikon's face-finding technology that automatically focuses on faces faster than ever
  - **Face Zoom-in** – zooms right in on the subject's face during playback for images shot with Face-priority AF
  - **D-Lighting** rescues dark or backlit images by improving brightness and detail where needed

### The cutting edge of elegant design and intuitive operation

The COOLPIX S60 not only adds further polish to the elegant sophistication, smooth curves and beautiful finish of Nikon's compact wave-surface design, but it also introduces a new dimension of fun and intuitive operation via a new 3.5-inch TOUCH PANEL LCD screen. One touch will prove that taking pictures has never been this fun before.

### The fun of fingertip shooting control

HOME screen

The HOME screen presents you with large icons that are easy to understand, and that offer easy selection of operating modes or controls, without hesitation or error. It's as easy to switch between modes at a touch while operating the camera, and even to control the zoom via icons on the TOUCH PANEL.

Sample photos for illustrative purposes.

### All-new 3.5-inch widescreen LCD monitor featuring TOUCH PANEL control

The 3.5-inch LCD newly developed for the COOLPIX S60 is a delight to both the eyes and the fingers. The monitor's amazing size, high resolution, 16:9 widescreen display, and 160° wide-viewing angle alone make picture-taking and playback more fun and exciting. But it's the addition of intuitive TOUCH PANEL control that introduces the simplicity and outright pleasure of easy fingertip control over most camera operations. And the panel features a hard-coated finish that protects against damage and wear.

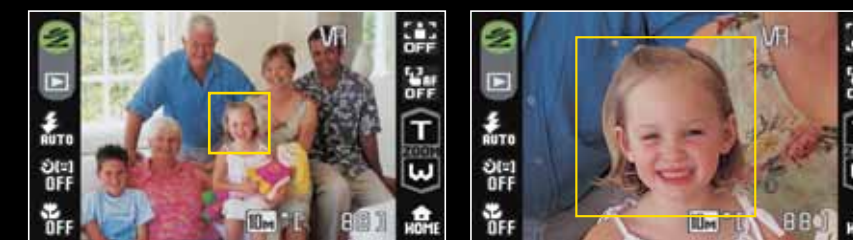

### Touch AF/AE

Touch your subject to lock autofocus and exposure

### Face-priority Auto Zoom

Touch the panel to select your subject for automatic zoom

Advanced features include the ability to lock autofocus and exposure on your subject by simply touching the corresponding location on the panel. Face-priority Auto Zoom lets you touch the panel to select a subject and have the camera zoom in automatically to capture the frame as you'd wish.

### A whole new world of playback pleasure

Touch controls bring a whole new dimension of fun to viewing images on the large 3.5-inch TOUCH PANEL LCD, from flipping through thumbnail images with your fingers, to quickly selecting and switching between images. You can even use the TOUCH PANEL LCD and supplied stylus to write handwritten memos to accompany selected images. HDMI connectivity allows you to enjoy high-quality playback and slide shows on an HDTV.
